# The "Happy Scientist" Seminar Series, 2019: #3

Building R Packages

We are pleased to announce the latest of the educational workshops sponsored by the IMAGE Program of USC's Biostatistics Division. This series, the Happy Scientist workshop series, is aimed at providing educational material for researchers, both students and faculty, about a variety of tools and methods that might prove useful to them. If you have any suggestions for subjects that you would like to learn about in future, please send email to (pmarjora@usc.edu). Our agenda will be driven by your specific interests as far as is possible.

Description: Building a R package can seem daunting with its many files and structure. This seminar will go through the different use cases for a R package, dos and don'ts and best practices. Finally a live demonstration starting with the creation of a R package ending with release on CRAN. The seminar will be given by Emil Hvitfeldt.

As ever, all members of USC are welcome to attend.

George Washington Carver 1864-1943

Agricultural scientist born into slavery who developed hundreds of commercial uses for alternative crops to cotton, such as peanuts, soybeans and sweet potatoes.

"Education is the key to unlock the golden door of freedom."

Title: Building R packages
Time: 12:00pm-1:00pm, Thursday March 28th.
Location: Soto (SSB) 116
